

# UNDERSTANDING & COMPARING SOCCER ODDS

Odd Type	Written As	How To Read It
Decimal	1.50	You win \$1.50 per every \$1 you wager
American	+200 <i>(underdog)</i>	If you bet \$100 you win \$200
American	-200 <i>(favourite)</i>	You need to wager \$200 to win \$100
Fractional/British	1/2	You win \$1 for every \$2 you wager

## Changing Odds View at Sportsbooks

Soccer games often use decimal odds. However, every sportsbook will let you switch to the view you prefer. You can find the "odds" option either at the bottom or under the "Settings" option.

## What is Juice in Betting?

Juice (also known as Vigorish or Vig) is the amount of money sportsbooks take from every bet you place.

The amount of juice is based on the odds – the smaller the odds compared to other sportsbooks, the bigger the juice.

## How is Juice Calculated?

To calculate juice, you need to calculate the implied probability of all three possible outcomes, then subtract 100 to get the juice percentage.

There are tools that can do it for you, so you can just enter the odds and let the tool do the calculations instead.

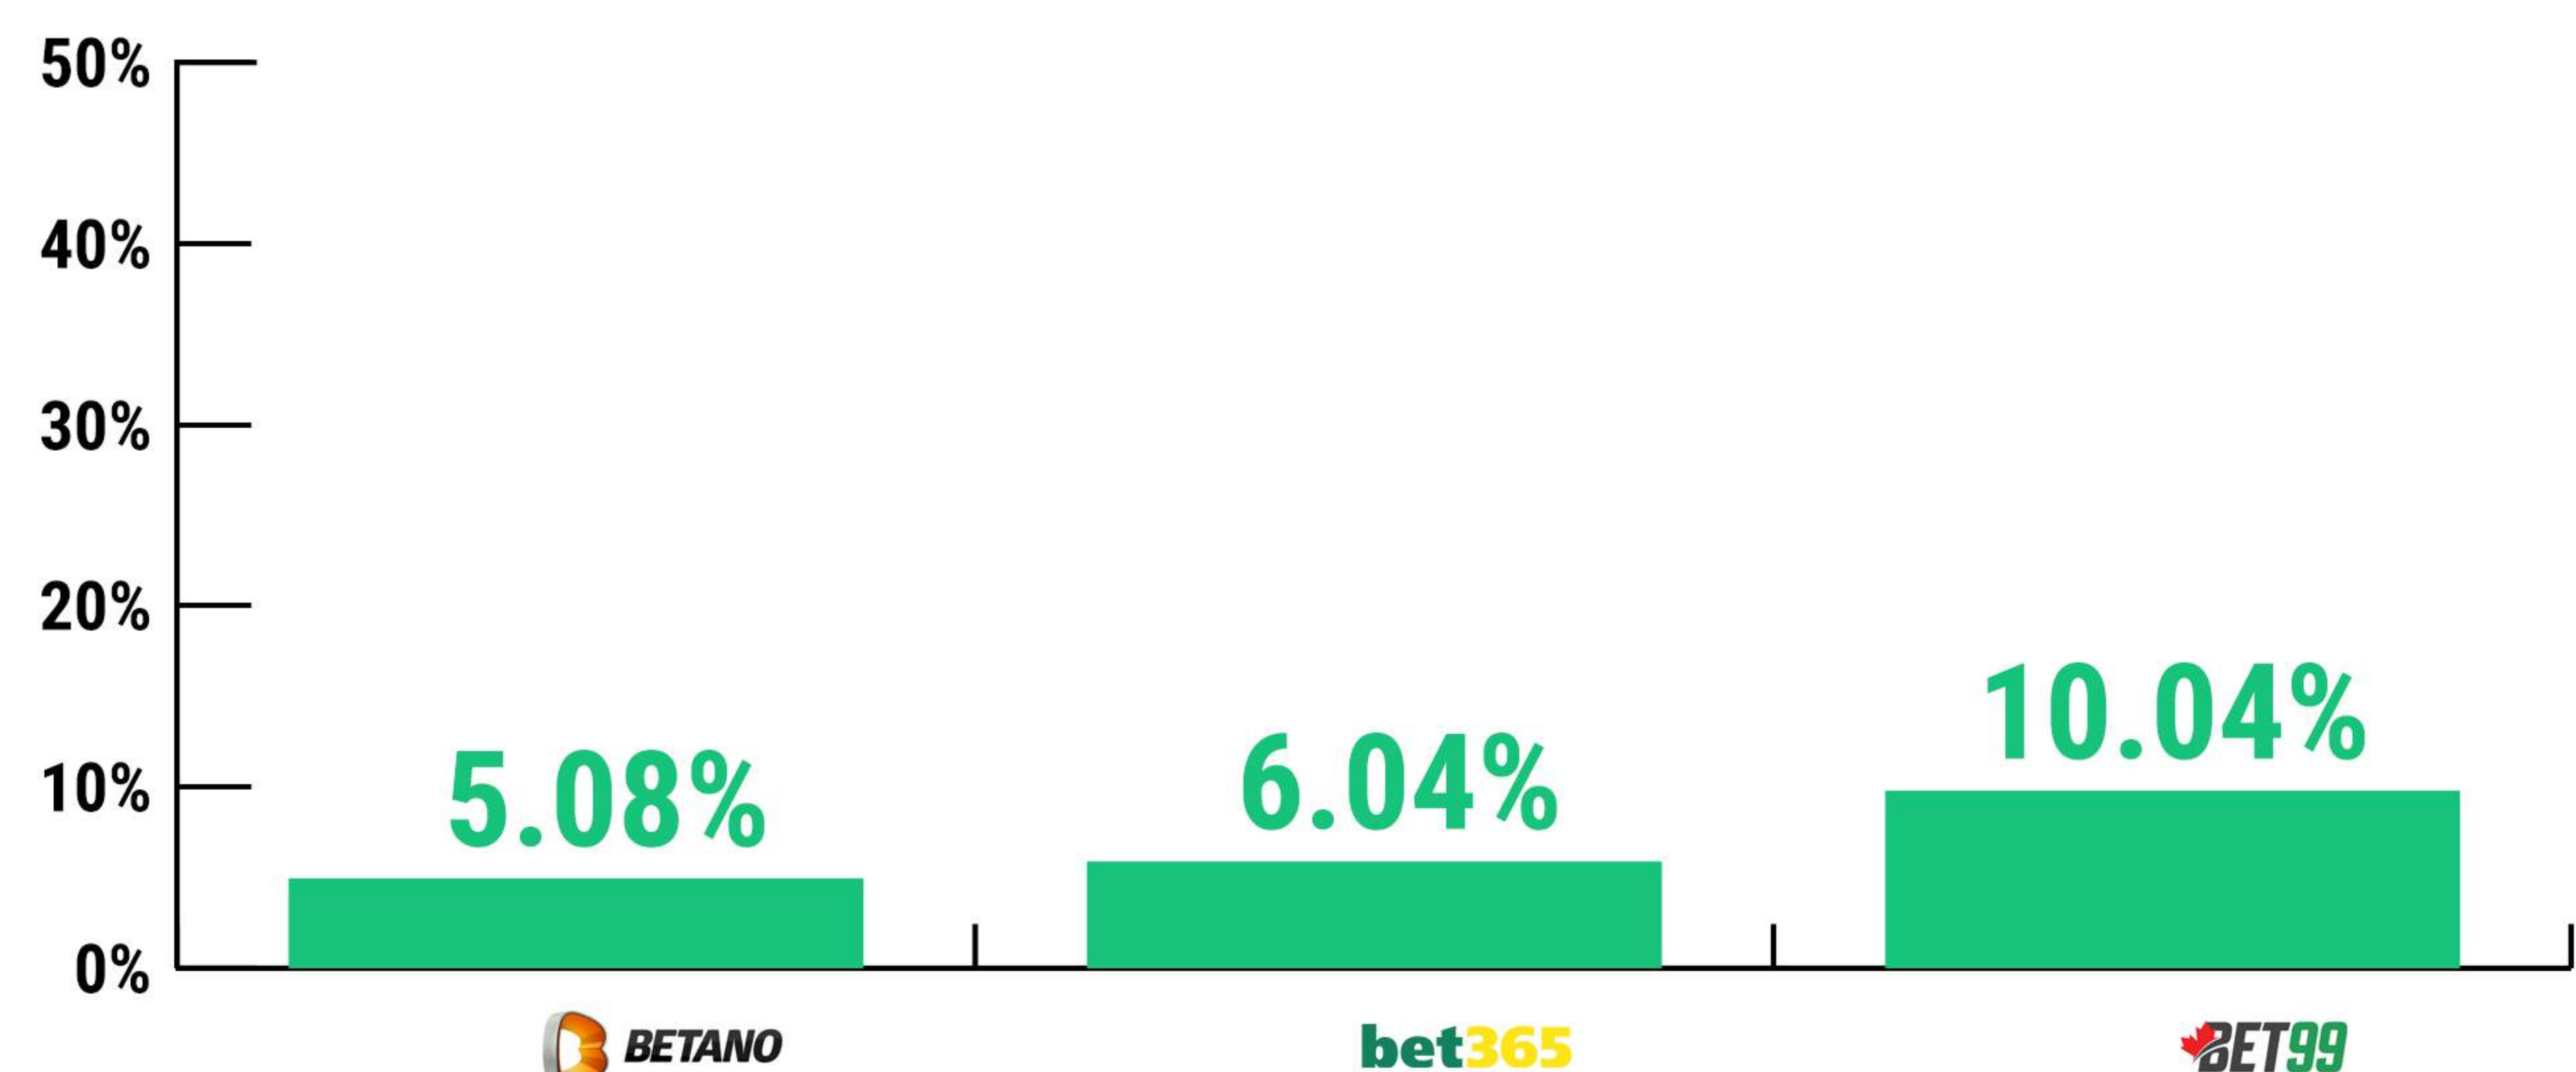

## Juice at Different Sportsbooks

The higher the juice, the more of your money the sportsbook is taking. We took an MLS game example to determine how the top Canadian sportsbooks perform in this regard.

	NY Redbulls	Draw	Charlotte FC
Betano	1.72	3.80	4.85
Bet99	1.71	3.50	4.35
bet365	1.70	4.00	4.50

After calculating implied probability, the juice is:
